

## Our Approach

### Utilizing the 'I' in BIM (Building Information Modeling):

The design and construction industry are advancing from the common 2D and 3D methods of illustrating the design intent to a holistic approach that incorporates 4D (Schedule Information), 5D (Cost Information) & 6D (Facility Management Information) directly into the design documents/database. MDI Access future-proofs your design by adding this information to your construction documents. MDI's BIM and Life Cycle Analysis Service offers the following benefits to the end user:

- Interactive design, with immediate feedback on budget and visual implications
- Reduced cost by minimizing change orders
- Documentation of relevant information and improvements of information transfer to those entrusted to manage your facility
- MDI manages the entire process—from customer RFI to designed and installed solutions
